Year of construction

2008–2009

Project description

The clubhouse of an exclusive golf club in South Korea is supported by wooden columns and features a circular skylight (diameter 3 m) in the centre.

The 2,600 m² large, double-curved roof construction made of glulam timber was manufactured entirely in Switzerland and completed within seven months.

Awards

International Prize for Sustainable Architecture
World Architecture Award, March 2010
