Year of construction

2012-2013

Planning contract

- Structural design concept
- Statics and dimensioning
- Structural analysis, approval and execution statics

Project description

For the newly designed IdeenReich, a complex wooden structure was designed to promote various motor skills for children playing. Slides, seesaws, slack lines and much more were integrated into these indoor play equipment. The structure is milled from flame-retardant plywood blocks of beech veneer and up to 14m high.
