Architect
Keller Hubacher Architekten, Herisau

Year of construction
2010–2011

- Planning contract**
- Structural analysis and securing of the construction
 - Project planning for restoration of the timber construction
 - Project planning for restoration of the solid construction

Project description
The Viehmarkthalle, also known as Chälblihalle, has stood in its place since 1869 and is used by the residents of Herisau for various occasions. After securing the structure in 2005, the complete restoration of the building began in 2010, allowing residents to continue using the building and preserving its charm for the next generation.

Construction costs
CHF 4,200,000
