Planning contract

Specialist planner for timber construction: from preliminary project planning to implementation

Year of construction

2013–2014

Project description

A new hotel wing was added to an existing hotel complex. The client opted for a hybrid structure: the basement floors were cast in concrete and the floors above were made of wood. The modern new building is impressive, with very pleasant ambient climate in the hotel rooms and excellent sound insulation. Thanks to its wooden design, Hotel Säntispark has become an absolute oasis of well-being.

It is the first four-storey hotel to be made of wood in the canton of St. Gallen.
