## Architect

Blumer-Lehmann AG, Gossau

## Year of construction

2022

## Planning contract

- Dimensioning
- Development of execution details
- Execution structural analysis

## Project description

In a private Indian home, the free-form timber structure stands in an atrium and supports a custom-made glass roof. Due to the elliptical leaves, it appears as a sunflower with dimensions of approx. 15.00m x 7.80m.

The structure is made of steam bent ash glulam beams to meet the high aesthetic requirements.
